The 1000th run

Do you believe in coincidences? A strange one happened to the Geneva hashing communities in September. The 10th anniversary run and the 1000th LG/CHF combined runs coincided. « *So What* » you may be tempted to comment. After all, its just one more *RUN FOR FUN*. Why all the fuss. Saturday 13th Sep, the day of the Anniversary Tri-hash-alon, finally dawned. The three hares: Sex Club, Frog Chopper and Come Lately chose to combine three trails rather than attempting the cycle-trail-swim originally planned. For two very good reasons: one the weather. The Geneva RAs managed a perfect day of sunshine including a strong wind off the lake. So bobbing about in peddle boats was naturally forbidden by the authorities. Secondly, Colin Powell was in town! Congratulations to the hares who avoided yet

The Harriers and the Harriettes MisManagers

another international incident. Beerstops at Trembley Park and Bains les Paquis were welcomed by the pack that, after the closing circle, retired to a nearby pub for more cheer. The combined count of 999 was now history—LG 618 + CHF 381. *ONON* to 1000!

After the August temperatures, the chill of early autumn was refreshing to the pack that, on Monday 15th Sep, circled on the Divonne Casino carpark. Although

two of the three hares, Mighty Mouse and Cave Bear, were invisible the floury trail was not. The FRBs avoided the longest check back but were put off trail by the shortest. A sprint past the preparations for a Tour de France lap followed the beer stop. A festive circle complete with bubbly, toasts and misdemeanour down-downs. Then a select seven hounds retired to the Golf Club dining room for a feast befitting the occasion. Iron Lady

The First Geneva Hash Weekend 11-12 September 1993

I live about a mile from Divonne and before I was transferred to Switzerland I was with the Dutch Embassy in Washington and was an enthusiastic Hasher, from Song-Meister to Beer-Meister and Religious Advisor (RA) to G.M. Hashnames are

Wrong Way and Bump&Grind. My wife's hashname is Dutch Treat. Our house is large enough to accomodate four people for free. I would like to help set out the trail on any of these dates so if you need me call me at the Netherlands Mission.

Best regards. OnOn Joop

Where it all began

Check out the
world website:

<http://www.gthhh.com>

It all started in Kuala Lumpur, Malaysia in 1938. Today there are more than 1,800 hashes with at least one to be found in every country around the world.

Mother Hash in KL asks that hares remember that, wherever possible, hounds much prefer running cross-country trails. In cities, like Geneva, it may be inevitable to have to set trails through some traffic, along urban streets and pavements. Especially during the dark winter months. At least try to include a park, reserve or residential traffic-free area.

Even though HHH has been dubbed « *the drinking club with a running problem* » we should remember the basic philosophy of our founders and the objectives which are:

1. To promote physical fitness amongst its members.
2. To get rid of weekend hangovers.
3. To acquire a good thirst and satisfy it in beer.
4. To persuade the older members that they are not as old as they feel.

Many packs break out the barbecue afterwards and make a party out of the occasion. Having formed a « *circle* » and armed with plenty of spare drinking vessels—or *plastic cups*—mismanagement introduce beer « *down-downs* » for the hares, visitors, leavers, returnees, new boots and other trail-related excuses. The RA, whose only responsibility is the *weather*, automatically gets a down-down if it rains!

« If you've half-a-mind to join the Hash, that's all you'll need. »

Convincing Interhash attendees about the NEXT INTERHASH location in TWO years

... a very friendly « recreational cross-country running for fun » activity open to *persons of all ages*. It feels good to get out and do it. Even if it is only for one hour a week. A few sociable beers at the finish of exercise is the primary goal. Actually catching the hare seems to be a rather distant secondary objective these days. Although it does still occasionally happen.

Hounds enjoy talking and comparing notes fraternising around the keg (now cans or bottles) of

beer after chasing the hares at yet another fun run.

If you are new in town, there is no better way to discover the non-touristy parts than running through them. You will also find your peers are able to point you in many right directions. This saves you having to make the same mistakes unnecessarily.

The emphasis is on spontaneity and good humour. Entertainment in the circle is often quite hilarious. No two chapters, or kennels, do it alike.

A voice from the past

I'm trying to recall my first run which was somewhere at the foot of the Jura on a Sunday morning. We climbed a mountain in the snow and returned to quite a smart restaurant for a late lunch. The hare was a round dutch guy and his wife always wore loads of lipstick for hashing. Distant memory but quite vivid. It was Anna's and my first HASH. Any idea where it was?

Hope to get back to the hash soon now that Victoria has started school. Scarlett

In fact Scarlett was a virgin on Run #5. By Run #210 she was a real hasher and always eager to make the beerstop.

IWIN checking with Kaptain Kardiak.

No way to forget the cheerful Hoarman

Why does Alzheimer hash with a notepad?

Iron Lady, you're late!
Deep Throat would you like to be the first to autograph my cast?

Hounds needing little introduction? and A few hashers from our past

Date	Who knows Who cares

Historical correctness

Leman Geneva Hash House Harriers established its presence in this region on 11 September 1933 with its inauguration run in Divonne, France. Organized by Iron Lady, an active member of Royal Milan and Bordighera HHH, 34 virgins made history: representing Milan 19; Pays de Gex 7; Geneva 4; Zurich 2, Bern 2. On 17 Feb'95 Forrest Dump announced hashing on Monday at 1900. By the end of 1996 hashing in the Lemman Region had become so popular that active LGH3 harriettes Bawdy Tail, Idle Vice and Sunshine announced the creation of a second Geneva hash. The inaugural run, held on 11 Jan'97, established the practice of trails each Wednesday evening.

Thanks to our Trail Master, PegLeg, LGH3 has a World Wide Web home page. It provides all sorts of useful information such as upcoming events, links to other hash home pages and a list of mismanagement contacts.

Announcement extracted from issue 4 of LGH3's trash.

1995/1996 On-Sec, Sunshine

Geneva hashing Rule #1 The Bone of Contention

This bone was presumed to be that of a lost/missing hasher last seen heading towards the Pirhana-infested Versoix river in Geneva. Lovingly brought back to the circle by Idle Vice, during a CHF3 run, the bone lazed about for a while in the trunks of cars.

The religious advisers of LGH3 and CHFH3, Captain Sensible and Captain Sensible, got together and unanimously decided to dedicate the bone to lost hashers. Furthermore, the bone is to belong jointly to both Geneva hashes, being passed back and forth between packs. In the circle after the run; the hasher who has run

with the bone should pass it on. If no lost hasher could be found, the hasher in whose care it is should pass it on to a late or stupid hasher. The hasher awarded the bone must run with it UNTIL he/she/it is able to pass it on to the next candidate

IN THE OTHER hash. CS
And if you are wondering why he is so sensible, meet his father!

For the benefit of those who question the authority for such a rule please refer to *WORLD WIDE HASHING POLICY* Only RAs have the authority to make rules!!

And the first rule is
THERE WILL BE NO RULE(R)s.
